Professional Experience

Web Developer/ Designer, *EA Designs (Freelance)*   06/2021 – present │ Fulton, MD
- Build responsive websites using HTML, CSS, and JavaScript.
- WordPress, JavaScript frameworks, and libraries.

Projects

Nucamp Campsite
This React.JS web application is a campsite reservation site that allows users to book campsites. This app uses Redux to store UI layers creating a smooth and user-friendly experience. The app also uses react animations and features from reactstrap.

Total Assisted Living
This application uses chat engine API in order to send and receive messages. It uses the "send message" component which allows the user to send a message to the second party and the "Is typing" component which indicates that a specific user is typing.
